

Code → Docker file → ECR (Storing)

/ping/<> Fargate ← ECS (Running)  
def ( )

↳ Hello <> . Welcome to Loan App

App.py

→

> Hello < > . Welcome to Loan App predictor

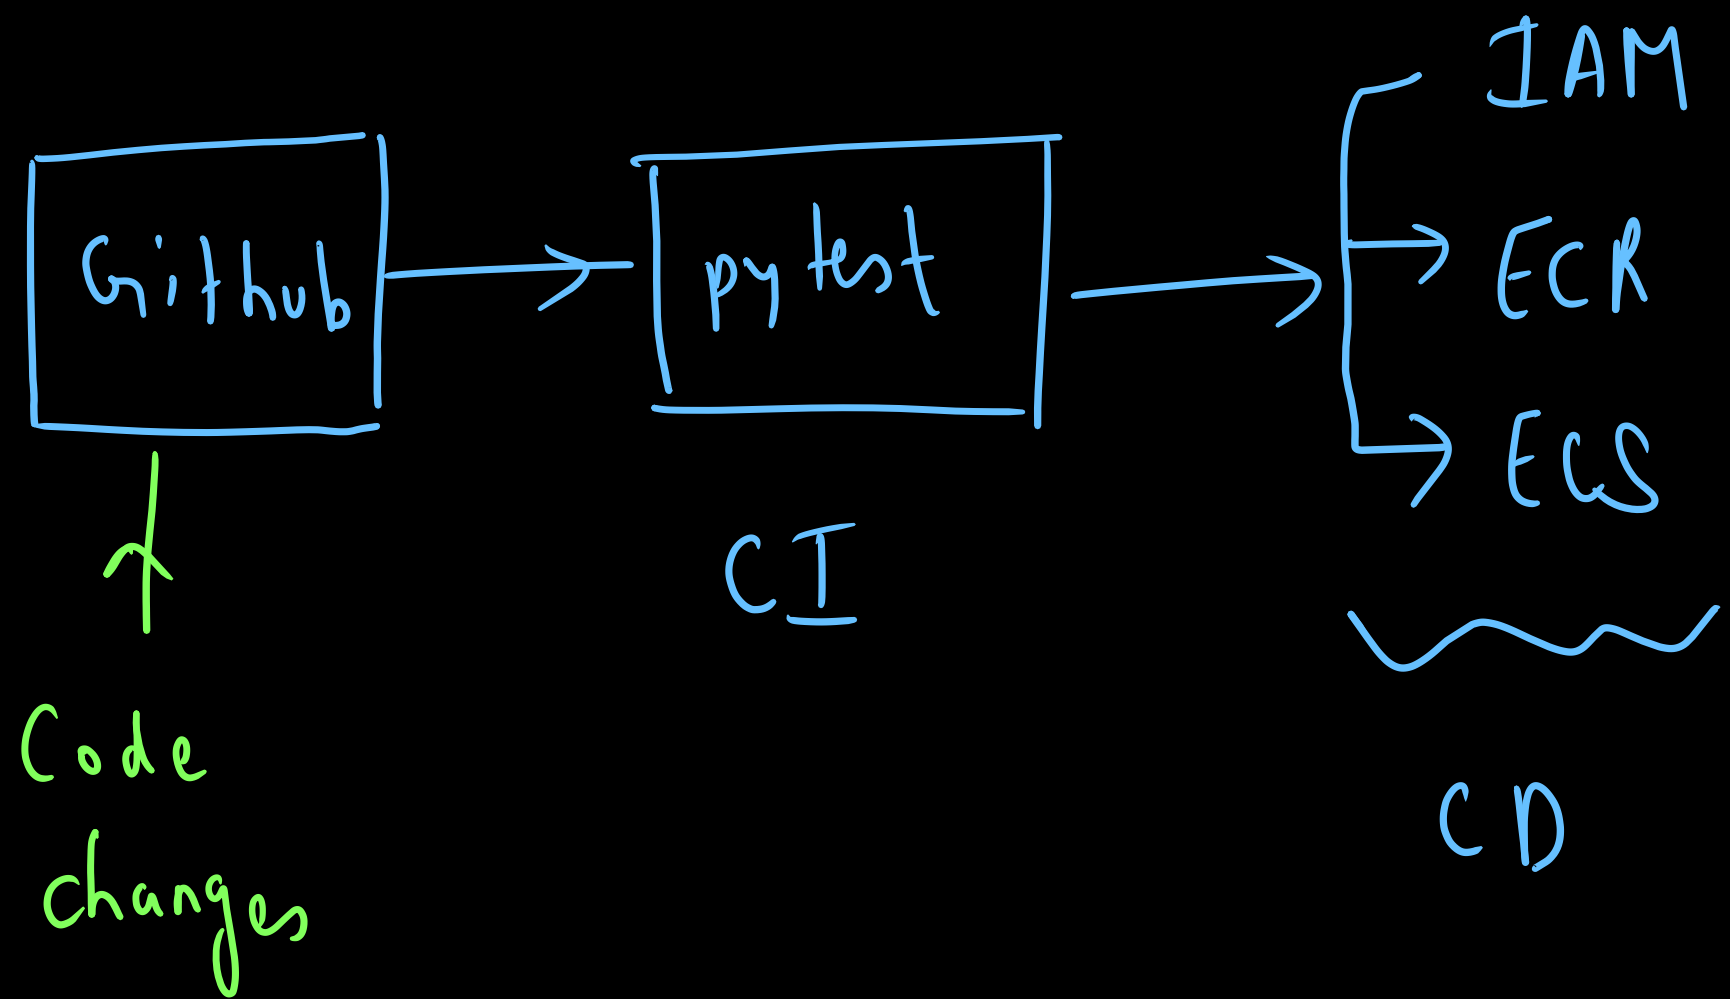

↓

Hello < > . Welcome to ML Ops

aws [ ]

① Re-execute all the steps  
done before

② All steps done automatically.

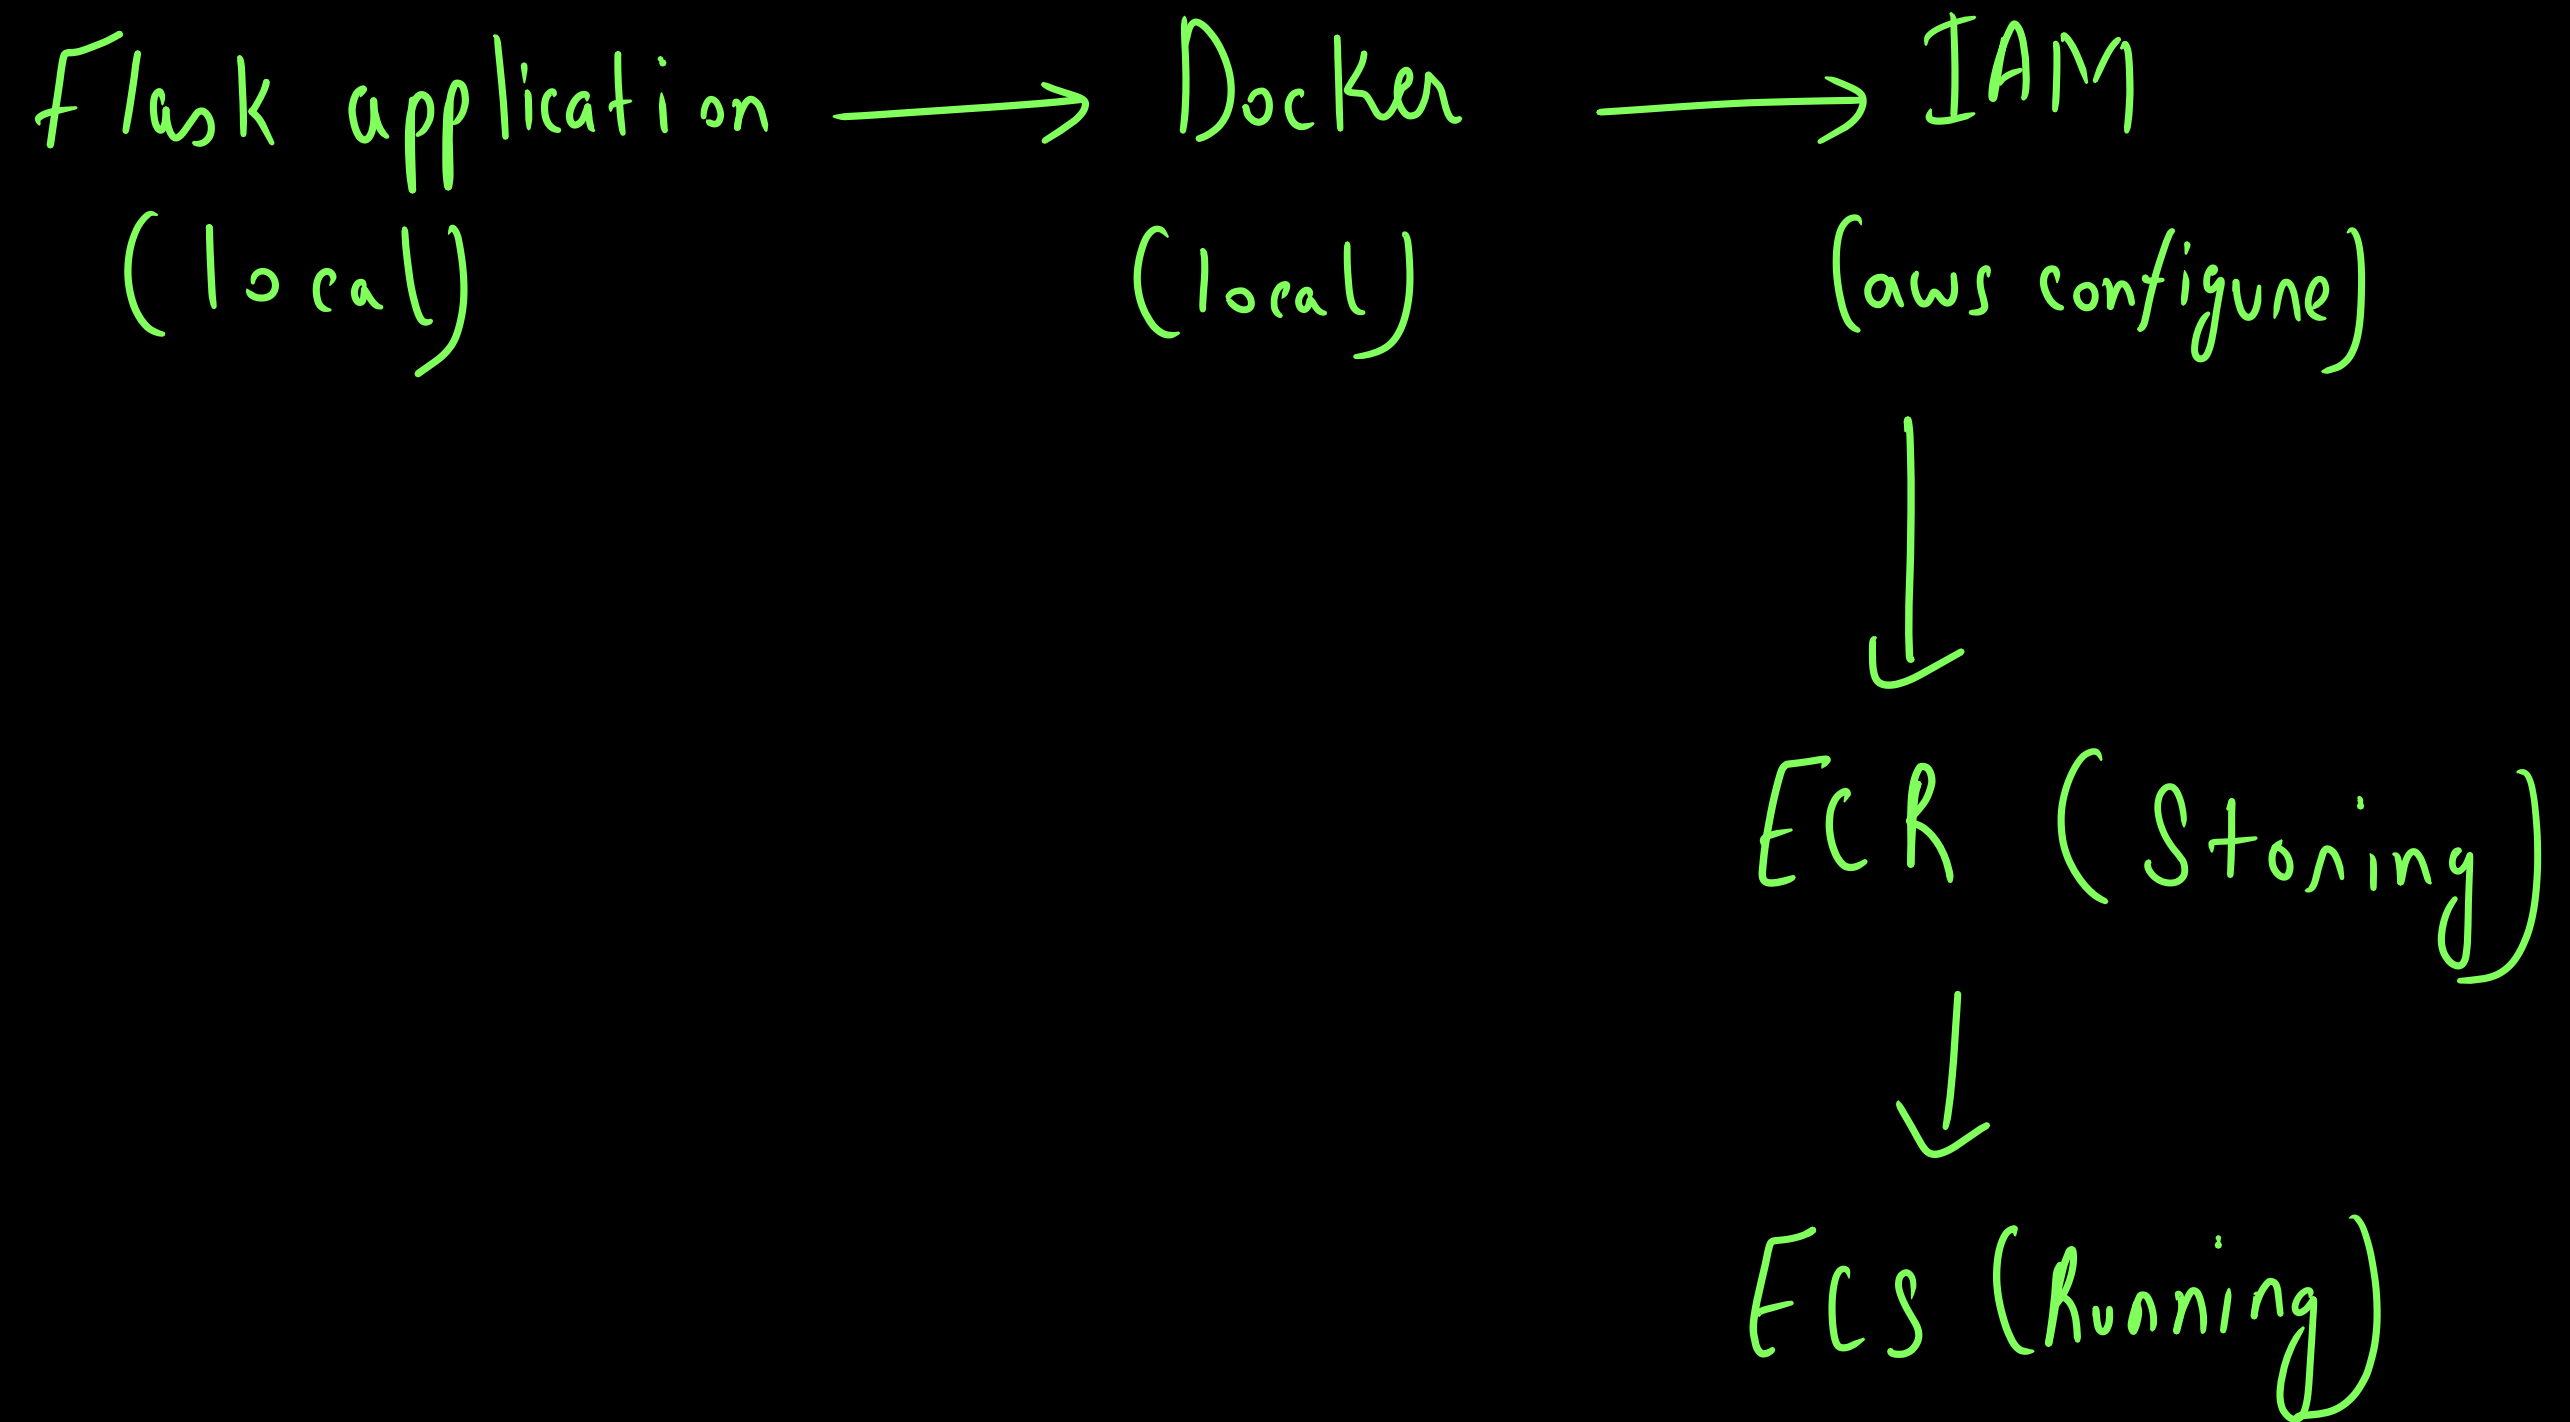

automate.yaml

Job1 → Pytest → CI

automate.yaml

{  
 ① Job1 → Pytest → CI  
 ② Job2 : → ECR  
          Ecs } → CD

① Passing Secret Key to github (Secret)

② Changing the automate.yaml file

↳ Job1 : pytest → CI

↳ Job2 : ECR + ECS → CD

③ Create Service in ECS
